KVICHAK MARINE INDUSTRIES

Kvichak Marine Industries has been delivering high quality, dependable, cost effective and environmentally friendly passenger vessels for over 30 years. Our clients include public transportation, excursion, dive and dinner cruise operators who depend on our vessels every day, year after year.

The Kvichak Marine design and engineering staff provide a full range of services from mission assessment through construction, delivery and life cycle support. Additionally our long standing relationships with numerous independent design firms including Incat Crowther, Morrelli & Melvin and Elliott Bay Design Group provide our clients with a range of expertise not available from most builders. All Kvichak Marine passenger vessels are built to comply with all necessary regulatory and class society rules, and typically include a USCG certificate of inspection.

We understand that one size does not fit all. We would like the opportunity to discuss and understand the unique needs of your business and to deliver your next vessel.
